

Regarding Covidprecautions at the European Championship in Västerås

From the 1st of December requirements for all indoor activities with more than 100 people over 18 or 16 years of age (clarifications regarding age will come) will be introduced.

The requirements says that all spectators/audience over 18 (16) years of age have to present a vaccination certificate to get access to the arena. That means that lifters, coaches, referees and the organizers are not included in these requirements.

BUT lifter and coaches will count as audience **ALL** other days except the day/days they have assignments and will then have to present a Covid vaccination certificate when entering the arena.

For those that have medical reasons for not being vaccinated it's required to present a medical certificate to confirm this.

Only vaccination certificates are valid. Anti-gen tests and other rapid tests do not apply.

The IPF protocol for covid precautions shall be followed as well. This includes that mask must be used by the spotters and coaches near the main platform and coaches in the warm up room. Officials, organizing people and lifters must use mask if the distance is less than one meter to a nearby person.

The organizer will provide addresses to Covid-19 test stations if anybody need to make tests.
